

How to Update Premium Tech Tool

1. The Client Update Agent can be accessed by clicking the Client Update Agent icon located in the PC's system tray area (at the lower right corner, near the clock display).

2. Click to open the Client Update window.

Don't See the Client Update Icon?

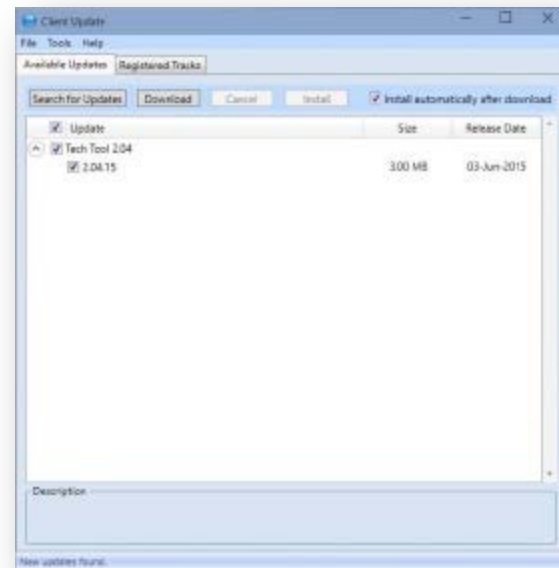

Go to **Start > All Programs > Client Update**

Click on **Client Update** to open

3. Click the “Search for updates” button in the upper left section of the Client Update window.

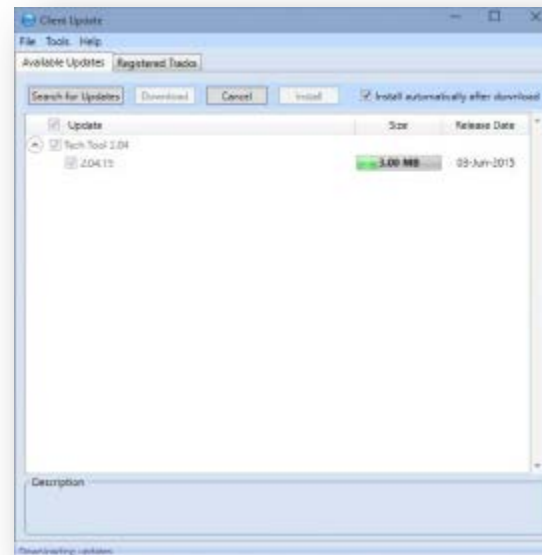

4. If updates are available, the Download button will be available. These updates will appear as items under the main application headings. Select all updates to be downloaded.

5. In order to install the updates automatically after they have been downloaded, click the “Install automatically after download” checkbox. Then click the “Download” button.

6. Progress information will be displayed as the updates are downloaded and installed.

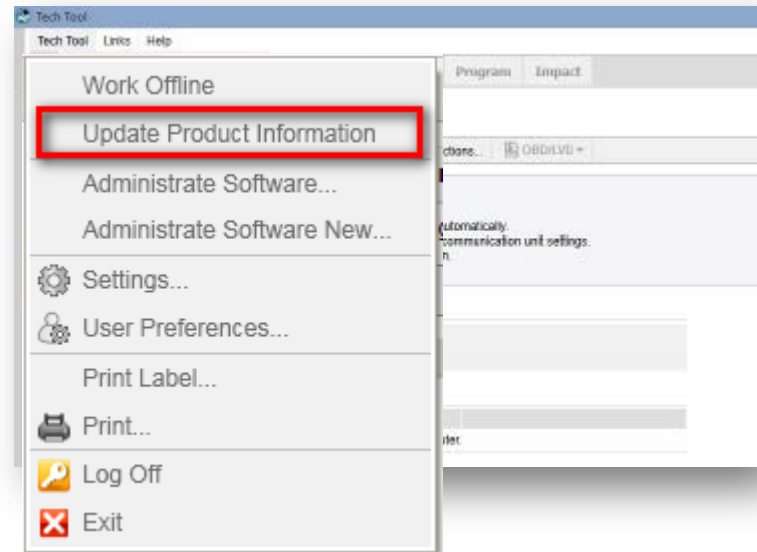

7. Close window when updates complete.

8. Launch Tech Tool, but do not connect the PC to a vehicle

9. Click on Tech Tool to view the drop-down menu

10. Click Update Product Information.

11. A window will be displayed to indicate the update is progressing

12. When complete, a status window will be displayed. Click Close to complete the process.
