

# Description of the Three (3) Programming Options

Programming Option	Description
<b>Update control unit with new (latest) software</b>	Update the software in the node with the newest software. Other dependent nodes may be updated as well.
<b>Reload control unit with existing software</b>	Reload the node with the exiting software. If the existing software no longer exists for download, an update will recommended instead.
<b>Replace hardware</b>	Order software to replace a control unit.
